## Experience:

### WestRock – Cost Estimator

September 2014 – Current

- Analyze data to prepare initial cost estimates and price quotes using a standard costing methodology and knowledge of the production process.
- Revise costs and quotes as needed based on information and/or operational changes in a timely manner.
- Coordinate costing information with material estimator, sales and pre-production planning departments.
- Conduct time studies on production runs and assist line leaders in evaluating production performance and efficiency.

### WestRock – Warehouse Clerk

October 2008 – September 2014

- Daily managed 10 people and advised management from other shifts and departments.
- Delegated tasks to efficiently unload and load incoming and outgoing inventory.
- Routinely created inventory reports and physically managed each customer supplied product.
- Performed reconciliation of inventory to ensure appropriate quality and quantity of customer product.
- Coordinated schedules for shipping and receiving of customer merchandise.
- Held certification in the disposal of hazardous waste and materials.
- Minimized company liability by disposing of damaged customer product
- Uploaded forklift reports and receiving logs, while managing Material Handler responsibilities.
- Promoted the importance of employee safety training and awareness as a member of the Safety Committee.
- Promoted health and wellness as a member of the Wellness Committee.
- Sought out, arranged for, and maintained employee discounts for the company.

### WestRock – Material Handler

June 11, 2001 – October 2008

- Forklift operator with responsibilities in restocking assembly lines, counting inventory, loading and unloading trucks.
- I also worked in and with other departments to maintain optimal job performance.
